Physical Planning and Construction
Department for Climate and Ozone Layer Protection

Zagreb, 14th September 2009

Subject: **International Ozone Day for the Preservation of the Ozone Layer: „Universal participation: Ozone protection unifies the world“**
- announcement

In order to promote the International Ozone Day for the Preservation of the Ozone Layer, Croatia has organised the following activities:

1. Since this year's theme of the European Mobility Week "Improving City Climates" is greatly connected to fighting climate changes in general, we decided on improved promotion of the International Ozone Day for the Preservation of the Ozone Layer during the European Mobility Week, especially on 16 September 2009. We invited all participating cities and towns in Croatia to develop various activities to promote the International Ozone Day for the Preservation of the Ozone Layer. During that day we are going to organise dissemination of Ozzy Ozone educational materials in 17 participating cities throughout Croatia to draw people's attention to the Preservation of the Ozone Layer.

2. We are organising the visit of a TV station team to Klinička bolnica Osijek which cooperated with us in the project „Demonstration project on the replacement of CFC centrifugal chillers in Croatia“, to the National Halon Bank in Varaždin and to “Training centre for servis technicians” at Faculty of Mechanical Engineering and Naval Architecture. They are going to make a report on this and broadcast it to show the public our efforts.

3. Croatian National Television conducted an interview with the Director of the Directorate for Atmosphere and Waste Management, Jasenka Nećak, B.Ch. which will be broadcast on 15 September 2009 to announce the International Ozone Day for the Preservation of the Ozone Layer in the popular show „Hrvatska uživo“. The interview with Jasenka Nećak was also broadcasted at Croatia National Radio 1.

4. Web site of the Ministry of Environmental Protection, Physical Planning and Construction has announced the International Ozone Day for the Preservation of the Ozone Layer at <http://www.mzopu.hr/> and invited all those interested to join in and promote the International Ozone Day for the Preservation of the Ozone Layer.

5. Jumbo posters which promote the International Ozone Day for the Preservation of the Ozone Layer were distributed on 20 sites throughout Croatia and will be placed there for the duration of two weeks.

6. Promotional T-shirts and ecological bags with the Ozzy Ozone logo for children and for adults with the „yellow theme“ from the poster.
